
Jack

WALLSYSTEMS

Michael Anastassiades

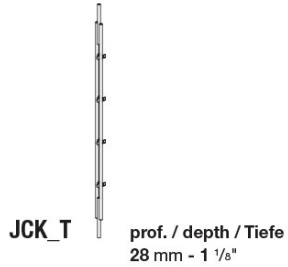

Description

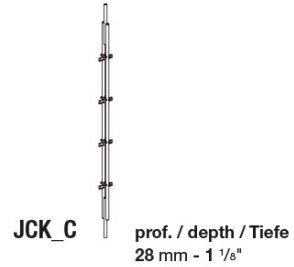

Jack is the result of the first collaboration between B&B Italia and Michael Anastassiades. Known for his skills in working with light, the Cypriot designer has designed a modular bookcase system with a striking degree of technological perfection. In its search for the creation of an innovative language, this design challenge revisits and modernises a design classic, the 1950's room centre bookcase, transforming it into a complement with a clean, essential yet architectural structure. The genius of the piece lies in concealing the engineered supports, including those holding up the laminated shelves, inside the vertical elements with a rounded section made of extruded aluminium and integrated by an exclusive, totally-invisible, floor-ceiling telescopic adjustment system. The system is available in 14 heights, ranging from 220 cm to 324 cm and taking in all measurements in-between, while the shelves are in two lengths, 75 cm and 90 cm, both 30 cm deep. Two are the finishes provided for the vertical elements and shelves for single-colour solutions, chalk white and black, both matt.

B&B Italia reserves the right to make technological and aesthetic improvements to its models, including changes to the sizes and materials, without notice. The technical drawings do not define the details of the product. The measurements shown are indicative and may undergo changes. In particular, the dimensions relevant to the padded parts are subject to usage tolerances over time caused by the normal adjustment of the padding. For the specific information, please contact the dealer closest to you.
