## Mayday Outdoor

Designed by Konstantin Grcic, 2000

Multipurpose lighting appliance suitable for installation outdoors. Hook/handle, which also works as a cable winder, and an injection-moulded opaline conical diffuser made from sustainable polypropylene produced from industrial process waste. Button switch located on the handle. The light source is protected from atmospheric agents by a transparent airtight capsule made from sealed polymethyl methacrylate with an elastomer gasket that helps achieve a protection rating of IP 65. As no glue is used in the assembly process, Mayday is easy to dismantle so that every part can be properly recycled.
