Eames Plastic Armchair

The Eames Plastic Chairs are renewed versions of the legendary Fiberglass Chairs. The original, which was the very first industrially produced plastic chair, was jointly developed with Zenith Plastics for the 'Low-Cost Furniture Design' competition organised by the Museum of Modern Art. In the current version made of polypropylene, these chairs are even more comfortable.

With its integrated armrests, the organically shaped shell of the Plastic Armchair offers superb comfort. The wide selection of bases makes it possible to use the chairs in a variety of settings: from the dining room or home office to the garden. Shells come in a broad range of colours and upholstery versions, so that components can be mixed and matched to find the perfect chair for individual needs.

The Eames Plastic Armchair is complemented by the Eames Plastic Side Chair without armrests.

Materials

- **Seat shell:** dyed-through polypropylene. All models (except RAR) are available with a seat cushion (screwed to the seat shell) or full upholstery. The fully upholstered version has moulded polyurethane foam padding covered in Hopsak fabric, attached to the shell with a welted edge. Covers available in all Hopsak fabric colours. Different shell and upholstery colours and various bases provide a multitude of possible combinations.
- **Options:** the Eames Plastic Armchair is available as a visitor, dining, swivel or rocking chair. Beam-mounted shells are suited for use in waiting areas.

Eames Plastic Armchair DAL

- **Base:** La Fonda base in polished, die-cast aluminium. (DAL = Dining Height Armchair La Fonda Base)

Eames Plastic Armchair DAW

- **Base:** wooden base, stained and lacquered in maple. Round steel cross struts in basic dark. (DAW = Dining Height Armchair Wood Base)

Eames Plastic Armchair DAR

- **Base:** wire base with cross struts, chromed or powder coated. The powder-coated version is suitable for outdoor use. (DAR = Dining Height Armchair Rod Base)
- **Note:** special additives retard the fading of colours due to UV radiation. However, if the chair is exposed to sunlight for prolonged periods, the colour may change over time. We recommend limited exposure to sunlight.

Eames Plastic Armchair DAX

- **Base:** four-legged, tubular steel base, chromed or powder-coated in basic dark. Powder-coated version suitable for outdoor use. (DAX = Dining Height Armchair X-Base)
- **Note:** special additives retard the fading of colours due to UV radiation. However, if the chair is exposed to sunlight for prolonged periods, the colour may change over time. We recommend limited exposure to sunlight.

Eames Plastic Armchair RAR

- **RAR base:** chrome-plated wire base with cross struts, solid maple rockers, stained and lacquered finish. (RAR = Rocking Armchair Rod Base)

Eames Plastic Armchair PACC

- **Base:** five-star base in polished die-cast aluminium, equipped with double castors in basic dark. (PACC = Pivot Armchair Cast Base on Castors)

Eames Plastic Armchair DAX

The DAX four-legged base and DAR wire base are available in dark grey and basic dark powder-coated options. These make the chairs suitable for outdoor use; all the more since special additives impede the fading of the seat shell colours in sunlight.

DIMENSIONS (in accordance with EN 1335-1)

**Eames Plastic Armchair DAR,
wire base with cross struts**

**Eames Plastic Armchair DAR,
wire base with cross struts with full upholstery**
