

S TABLE (Designer Xavier Lust)

Elle Decoration International
Design Award, 2008
category: furniture

ADI Design Index selected
for the XXII Compasso
d'Oro ADI

Schoener Wohnen, Neue
Klassiker 2008
category: tables

Round or oval tables with an S-shaped twisted stand, moulded in:

- Cristalplant® (a composite material made up of natural minerals and polyester and acrylic polymers) in matt white.
- Ceramilux® (a material composed of natural minerals and polyester resin) lacquered in gloss black (not available in dia 126 cm).

For further information on materials, please see on page 4.52.

The mould gives shape to its unusual design through self-rotating multiple openings. The stand is provided with adjustable feet.

Tops for the matt white stand:

- 15 mm thick clear or extra light glass
- 15 mm thick clear or extra light tempered glass
- MD wood fibreboard in matt white with anti-scratch finish. Thickness 30mm

- Cristalplant® in matt white.

For further information on materials, please see on page 4.52

Tops for the gloss black stand:

- 12 mm thick smoked grey tempered glass (not available in dia 126 cm).

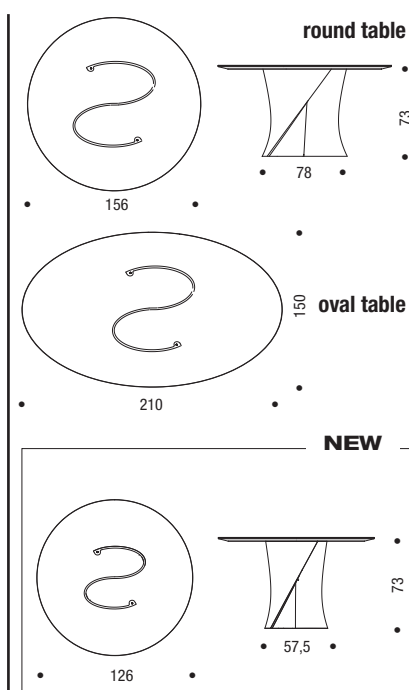

Dims

With tables with tops in dia. 140, 156 and 175 cm and oval top in size 150 x 210 cm, the base has max. overall dims of 78 cm.

With the new round table with top in dia. 126 cm the base has max. overall dims of 57.5 cm.

Height: 73 cm with tables in lacquered wood or resin, 71 cm with glass tables.

Measurement tolerance is +/- 1 cm.

MATERIALS

CRISTALPLANT® for 4VS_ † Flow Low Table • S Table with white stand

TECHNICAL SPECIFICATIONS

CRISTALPLANT® is a unique highly-advanced composite material made up of a high percentage of natural minerals (ATH derived from bauxite) and a small percentage of extremely pure polyester and acrylic polymers; thus it is an inert hypoallergenic and non-toxic material.

CRISTALPLANT® is a 100% made-in-Italy solid surface.

CRISTALPLANT® is 100% recyclable, fireproof (class 1), with a high UV resistance; it is compact and non-porous, hygienic and with a soft texture thanks to its velvet finish similar to natural stone.

CRISTALPLANT® is 100% restorable, ie it can be brought back to its original condition simply with a detergent and an abrasive sponge (also cigarette burns can be removed). Its characteristics of durability and restorability make it eco-compatible .

CERAMILUX® for Flow Low Table • S Table with black stand

TECHNICAL SPECIFICATIONS

CERAMILUX® is a material composed of natural minerals (calcium carbonates and aluminium trihydrates) and polyester resin. The gelcoat film coating the surface of the material is made of a highly-resistant acrylate polyester.

CERAMILUX® shows a good resistance to shocks and stress, to bending stress, tractions and compression: this allows it to obtain certain thicknesses without the support of other materials, thus creating self-supporting products.

CERAMILUX® is a high-quality material with an excellent resistance to shocks, sudden

changes of temperature and to wear, typical of the home environment. Good resistance to chemical agents and sun rays.

KERAMIK for tables and coffee tables: Keramik • Lim 04 • Desk • Edgar II • Ra 07 • T Table

TECHNICAL SPECIFICATIONS

Laminated ceramic features uniquely peculiar technical characteristics thanks to the innovative methods of ceramic treatment and production (laminated-porcelainized thin gres).

- Extreme surface hardness (comparable to topaz) and high bending strength.
- Resistant to stains, water, detergents and acids.
- Not inflammable, reaction to fire: class 0.
- Inalterability of the chromatic characteristics.
- It doesn't release toxic substances and there is no warping if heated with open flame

CATAS TESTS PERFORMED ON CERAMIC

- fastness to light UNI 9427/89
- resistance to cold liquids EN 12720/97
- tendency to hold dirt UNI 9300/88 and FA276/89
- scratch resistance UNI9428/89
- reaction of surfaces to detergents PTP53/95

Other tests related to technical characteristics:

- fire resistance, wearproof, hardness resistance, abrasion resistance and water absorption resistance

The material can have slight impurities, due to the particular production treatments, still accepted quality standards are complied with.

RESIN for tables and coffee tables: Desk • Lim 04/Lim 04 Extra• Lim 04 Extension T • Colors/Colors Extra • Colors Extension T • T Table • Ext-Table

TECHNICAL SPECIFICATIONS

The resin is composed of natural minerals and very fine acrylic, mass-pigmented in white. The most advanced production process ensures the highest quality of the surface and high technical performance.

Technical specs:

- It does not absorb: it is non-porous and extremely resistant to stains
- Its colour does not change over years
- It is ecological and hygienic thanks to the acrylic resin
- Easy to clean: no special care is required. For everyday cleaning, simply use a

damp cloth and a soft cleanser.

Stubborn stains, scratches and small cigarette burns can be removed with an abrasive creamy detergent.

CEMENT for table Robin

TECHNICAL SPECIFICATIONS

The attractive hand finished application creates tops in a variety of finishes and colours.

Thanks to this feature, each table becomes a unique, handcrafted product.

Cement is applied by hand with a stain-resistant treatment that prevents the immediate absorption of stains.

As with any material, frequent cleaning is advisable to prevent prolonged contact with dirt and liquids from causing permanent stains.
